

ガスのお湯はいつでもたっぷり。 お風呂はやっぱりキモチイイ！

よーし、あと20 数えるんだぞ。

ふう、疲れがとけてリフレッシュするね。

ガスだから、必要な時に必要なだけお湯が使えるし、
浴室暖房や乾燥までできるのもいいね。

**With gas, there is always plenty of hot water.
Doesn't a bath make you feel just great?**

Ok, just another 20 seconds. A bath always takes away the tiredness and leaves you feeling refreshed, doesn't it? Because it's gas, we can use as much as we need, whenever we need it. Not only that, we can also use gas for heating and drying the bathroom.

かんたんリモコン

ガス給湯器には全自動機能が付いています。お湯はりから追い焚きまで、操作はリモコンでワンタッチです。お湯切れの心配もなく、いつもたっぷりのお湯が使えます。

Convenient Remote Control

The water heater includes functions for fully automatic operation. One touch with the remote controller takes care of everything, from filling the tub to reheating the bath. There is always plenty of hot water available, and there is never any need to worry about running out.

浴室暖房乾燥機が大活躍

入浴後に乾燥機を使えば洗濯物と浴室がダブルで乾かせます。浴室のカビ防止になり、お掃除もラク。冬期は入浴前に暖房を。脱衣室と浴室の温度差をおさえ、急激な血圧変化を防ぎます。

Convenient and Effective Bathroom Heater and Dryer

If you use the dryer after taking a bath, you can dry both your bathroom and your laundry at the same time. This makes cleaning easy and prevents molds in the bathroom. In wintertime, use the heater before taking a bath. This reduces the temperature difference between the dressing room and bathroom in order to prevent sudden changes in blood pressure.
